THE «BEEF SYSTEM» WORKS TOGETHER: NEW ITALIAN SUSTAINABILITY SCHEME

Coldiretti - AIA is the largest Italian Farmers' Organization representing the farmers' interests on the national territory. The agreement aimed to re-launching the bovine population, make the breeding farms sustainable and valorize the Italian livestock production.

Italian farming system is moving to a reliable national sustainable scheme engagement, aligned with the UE Beef Roundtable and coordinated by DQA (Italian Agri-Food Certification Agency).

THE ITALIAN SUSTAINABILITY SCHEME IN THE EUROPEAN CONTEXT

What does ERBS Recognition Mean?

The diagram illustrates the flow from ERBS (European Roundtable for Beef Sustainability) through 8 ERBS Outcome Targets to Country Platform Beef Sustainability Programmes. These programmes then lead to Companies sourcing beef from these programmes. A callout box indicates the need for a framework for ERBS to recognize established programmes committed to achieving the targets.

Animal Medicines

Preserve the effectiveness of animal medicines in beef farming

2.1 Total usage of antibiotics below 10mg/PCU by 2023

Target	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
Appropriate	~15%	~45%	~25%	~10%	~5%
Ambitious	~15%	~35%	~30%	~15%	~5%

Difficulty Level	Percentage
Very easy to achieve	14%
Easy	29%
Moderate	33%
Hard	24%
Very hard to achieve	0%
